what is java language?

Java is a high-level, object-oriented programming language created by Sun Microsystems (now owned by Oracle). It is designed to be platform-independent, meaning a Java program can run on different operating systems without modification by using the Java Virtual Machine (JVM).

Java is widely used to build web applications, mobile apps (especially Android), desktop software, enterprise systems, and server-side applications. It emphasizes security, reliability, and performance, with features such as automatic memory management (garbage collection), strong typing, and a rich standard library.

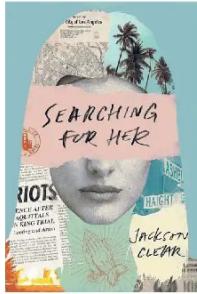

Because of its "write once, run anywhere" principle, strong community support, and scalability,

Java is commonly used in large systems like banking software, enterprise platforms, and cloud services.

Program Design

We have flowcharts, pseudocode, and test data before coding.

Flowchart for member registering

Flowchart for calculating fine

```
1 START
2   DISPLAY "Enter Member ID"
3   INPUT memberID
4
5   IF memberID is valid THEN
6     IF memberHasFines is TRUE THEN
7       DISPLAY "Access Denied: Please pay outstanding fines."
8     ELSE
9       DISPLAY "Enter Book ISBN"
10      INPUT bookISBN
11
12      IF bookStatus IS "Available" THEN
13        UPDATE bookStatus TO "Loaned"
14        SET dueDate = currentDate + 14 days
15        DISPLAY "Success! Book due on: " + dueDate
16      ELSE
17        DISPLAY "Error: Book is already checked out."
18      ENDIF
19    ENDIF
20  ELSE
21    DISPLAY "Error: Invalid Member ID"
22  ENDIF
23 END
```

Pseudocode for borrowing a book

```
1 START
2   DISPLAY "Scan or Enter Book ISBN:"
3   INPUT bookID
4
5   // Step 1: Verify the book was actually checked out
6   IF bookStatus IS NOT "Loaned" THEN
7     DISPLAY "Error: This book is not marked as checked out."
8   ELSE
9     // Step 2: Calculate Fines
10    SET returnDate = currentDate
11    SET dueDate = getDueDate(bookID)
12
13   IF returnDate > dueDate THEN
14     SET daysOverdue = returnDate - dueDate
15     SET fineAmount = daysOverdue * 0.50 // Assuming $0.50 per day
16     DISPLAY "Book is Late! Fine incurred: $" + fineAmount
17     ADD fineAmount TO memberRecord
18   ELSE
19     DISPLAY "Book returned on time."
20   ENDIF
21
22   // Step 3: Update System State
23   UPDATE bookStatus TO "Available"
24   MARK loanRecord AS "Completed"
25
26   DISPLAY "Return successful. Thank you."
27 ENDIF
28 END
```

Pseudocode for returning a book

Test Case	Member ID	Book Status	Has Fines?	Expected Result
Normal	M101 (Valid)	Available	No	Success, Status -> Loaned
Fine Block	M102 (Valid)	Available	Yes	Error: "Please pay fines"
Unavailable	M101 (Valid)	Loaned	No	Error: "Book already checked out"
Invalid User	X999 (Invalid)	Available	No	Error: "Invalid Member ID"

Test data for borrowing a book

Input	Processing	Output
Book ISBN / ID	Find the active loan record	Return Confirmation
Return Date	Calculate days between Due Date and Return Date	Fine Amount (if applicable)
Member ID	Update Book status to "Available"	Updated Member Account

Test data for returning a book

Test Case	ID Number	Database Status	Expected Result
New User	12345	Not Found	Record Created, New ID Issued
Existing User	12345	Already Found	Error: "Already Registered"
Missing Info	(Empty)	N/A	Error: "Fields cannot be blank"

Test data for member registration
